0.28" 3.5-30V 2 WIRE DC VOLTMETER RED

- **Wide Voltage Range:** This 0.28inch 3.5-30V Two Wire DC Voltmeter supports measurements from 3.5V to 30V. And its broad range also confirms that this is versatility and compatibility with various power sources.
- **Compact Design:** It is with a small 0.28-inch display size, this 0.28inch 3.5-30V Two Wire DC Voltmeter gives a space-efficient solution for embedded systems and tight installations.
- **Two-Wire Connection:** This 0.28inch 3.5-30V Two Wire DC Voltmeter feature a simple two-wire connection. And its simple connectivity also enhance ease of use and reduces setup time in electronic projects.
- **Red LED Display:** It is equipped with a vibrant red LED display & also confirms that this is clear voltage reading even in low light environments. The red display enhances visibility and readability, improving user experience in different applications.
