RPFAN
05V DC 0.2A Cooling Fan For Raspberry PI

• DC 5V 0.2A 4010S Cooling Fan for Raspberry Pi is a small but powerful fan.
• The cooling fan finds its use as an exhaust fan on the Raspberry pi case.
• It maintains the temperature of the extruder, which results in good heat dispersion and wonderful performance.
• Good airflow
• Noiseless Performance
• Very low Current consumption
• Easy to install and connect.
