RE1230

1 CH Relay Module 12V 30A

• This 1 Channel 12V Relay Module is capable of actuating 240VAC/30A circuits safely – Eliminating dangers of high current circuits for users.
• Operating Voltage – 12VDC Max Current Control – 30A Max Voltage Control (AC) – 240V Max Voltage Control (DC) – 30V
• Output Modes – Normally Open / Normally Closed Dimensions – 40 x 34 x 22mm Weight – 35g
• Despite being able to actuate high current and high voltage circuits, the relay itself operates on up to 12VDC, which is safe for users if a fault occurs.
• Without a relay, if the high current circuit were to leak directly into a user, it could cause serious harm to a user and damage to the components.
