RE51

1 CH RELAY MODULE 5V

• 5V DC low level trigger
• 5 V relay can be used for home automation configured with micro-controller
• LED indication of relay functioning
• Operating voltage: DC 5V; Trigger current: 5mA; Normally open interface maximum load: AC 250V/10A, DC 30V/10A.
• Trigger Type: Low = ground level = logic 0 = logical false | High = supply voltage (usually Vcc or Vdd) = logic 1 = logical true.
