VM1260

12V-60 Capacity Indicator Charger Tester Volt

• It can also be used for other power/voltage measurement purposes.
• Double display battery + voltage at a glance.
• The display is more intuitive.
• The upper 8 bars show the battery power (2 red and 6 green).
• Downlink voltmeter (display battery voltage), voltmeter decimal point automatic shift accuracy is higher.
• It has a wide range of applications, including lithium battery packs, lead-acid batteries, car batteries, electric car batteries, and many other types of batteries and electric equipment.
• The calculation of the existing voltage is the same as that of the power display meter of an electric vehicle.
• The meter head automatically recognizes the voltage and electricity and has a reverse connection protection function (reverse connection will not burn).
