SVALVE90

12V DC WATER AIR INLET FLOW SWITCH 1/2" RIGHTANGLE

• Plastic Water Solenoid Valve used in automatic control system: solar automatic water supply, infrared induction ware, water dispenser, water control machine, automatic water dispenser, water heater, campus card equipment, etc.
• It will become hot when it works because there are so many coils inside. It’s normal and safe phenomenon.
• Inlet hole has Filter,Flow Direction: Unidirectional ; Operation Mode: N/C(Normally Closed).
• Work form: normally closed/normally open
• Mode of action: type
• Operating voltage: DC12V, DC24V, AC220V
• Ambient temperature: 0-50
• Average temperature: 0-100
• Working pressure: Having pressure 0.02-0.8Mpa
• Water pressure resistance: 1.6Mpa
• Power connection: standard socket spring 6.3
• Medium: purified water and tap water. (Not suitable for acid-base, thick, viscous and other non-liquid liquids).
