

TC4056

1A 5V-6V 4.2V LITHIUM BATTERY CHRG MODULE TYPE C

- incorporates automatic charge cycle termination and resumption for efficient charging.
- With protection board, over-voltage protection, over-discharge protection, and over-current protection. Over-discharge protection value 2.4V; Over-current protection value: 4A
- Suitable for all types of 3.7V lithium batteries, small appliances modification and tablet PC retrofit charging port. Suitable for single lithium battery (parallel connection is not limited, can not be connected in series).
- Note: The first time you use it, you need to connect the power supply to activate the Charging protection board! If you are the first time to do this job, we suggest you can watch related video on the Internet before installation.
