BP220

2 Series 20A 18650 PCM 7.4V

- 100% brand new and high quality
- Charging voltage:8.4V-9.0V
- Continuous charge current(upper limit):10A
- Applicable scope: Suitable for lithium batteries with nominal voltage of 3.7V and full voltage of 4.2V (including 18650, 26650, polymer lithium batteries, without limitation on the dimensions)
- Balanced version: Suitable for starting currents below 25A and below 50W power drills, or resistive loads below 168W, with balanced charging function.
