BP13

3.7V Lithium Battery Protection Board 3A

- This is a 1S 3A Lithium-Ion BMS Module.
- This is a single-cell Lithium Ion or Lithium Polymer battery charge and discharge protection module.
- It provides overcharge, over-discharge, and overcurrent protection. The charging voltage must be 4.2V.
- The module is compact and can be fixed directly with the battery.
- Small size designed for a four-cell battery pack.
- Simple and convenient circuit for easy connections
- Over-charge/Over-discharge Protection.
- Pre-soldered Nickel Strip ready to mount on battery.
