## 3 Series 12V 18650 PCM 11.1V 12.6V 10A Cheap

• For three 18650 batteries or polymer lithium batteries combined in series
• Protection Mechanism: Overcharge, overdischarge, overcurrent, short-circuit protection
• The pcb protection board is small in size and suitable for many applications requiring high integration and low cost. It can meet various performance requirements and ensure the absolute safety and reliability of the battery pack
• his protection board is three series of lithium battery protection board.The PCB protection board is suitable for lithium battery pack of 11.1V, 12V, 12.6V. Its quiescent current less 30uA, so the power consumption is small
