

# ESP32EX

## 30PIN ESP32 EXPANSION BOARD TYPE C USB & MICRO USB

- PCB material: high-quality FR-4 material
- Number of PCB layers: 2 layers
- PCB thickness: 1.6mm
- Size: 68mm\*53mm\*10mm
- The module is safe, reliable, and scalable to various applications
- The expansion board adopts a double-layer design, with a pin on both sides
- Good stability and high reliability
- The breakout board can expand one GPIO pin of the ESP32 board to two, great for you to reuse all the pins, and a great tool for your project
