# AD8232

## AD8232 Kit ECG Measurement

- AD8232 adopts double poles high-pass filter to eliminate the motion artifacts and electrode half-cell potential
- Rated temp range : 0-70degree
- Working temp range: -40-85degree
- Material:  Plastic
- Size: 35 x 27 x 3mm
- Color: Red
- This is Heart Rate Monitor Kit with AD8232 **ECG sensor module** good quality.
- The AD8232 is an integrated signal conditioning block for ECG and other bio potential measurement applications.
- SDN, LO+, LO-, OUTPUT, 3.3V, GND provide essential pins for operating this monitor with an Arduino or other development board
