

AD8232 AD8232 Kit ECG Measurement

• AD8232 adopts double poles high-pass filter to eliminate the motion artifacts and electrode half-cell potential

Rated temp range : 0-70degreeWorking temp range: -40-85degree

Material: PlasticSize: 35 x 27 x 3mm

• Color: Red

• This is Heart Rate Monitor Kit with AD8232 **ECG sensor module** good quality.

- The AD8232 is an integrated signal conditioning block for ECG and other bio potential measurement applications.
- SDN, LO+, LO-, OUTPUT, 3.3V, GND provide essential pins for operating this monitor with an Arduino or other development board
