AMS175

AMS1117 5V Power Supply Module

• Input: DC 6.5V – 12V (input voltage must be more than output voltage (more than 1V))
• Output: 5.0V (+-0.05v error), 800mA (load current cannot exceed 800ma)
• Onboard AMS1117 chip.
• Onboard power indicator to indicate power is turned on: Red LED.
• Small Compact Size, 4Pin Type, Breadboard Friendly.
• Dual-panel design, the layout is nice
