

AMS175

AMS1117 5V Power Supply Module

- Input: DC 6.5V – 12V (input voltage must be more than output voltage (more than 1V))
- Output: 5.0V (+0.05v error), 800mA (load current cannot exceed 800ma)
- Onboard AMS1117 chip.
- Onboard power indicator to indicate power is turned on: Red LED.
- Small Compact Size, 4Pin Type, Breadboard Friendly.
- Dual-panel design, the layout is nice
