

## ANANO ARDUINO UNO NANO V30

- The Nano board compatible with arduino has an operating voltage of 5V.
- The Nano board compatible with arduino has 14 Digital input / output ports: TX, RX, D2 ~ D13.
- This Nano microcontroller is compatible with arduino uses Atmel Atmega328P-AU MCU.
- The CH340 Nano microcontroller board can be powered via the mini-USB connection, 6-20V unregulated external power supply (pin 30), or 5V regulated external power supply (pin 27). The power source is automatically selected to the highest voltage source.
- $\bullet$  The size of Nano V3.0 with CH340 Chip is only 43 mm x 18 mm
