

MOBOM1/MOBOM

BO METAL GEAR MOTOR SINGAL SHAFT 6V 110RPM/BO METAL GEAR MOTOR DUAL
SHAFT 6V 110RPM

- Operating voltage: 3V-6V DC, Output: 110 RPM
- Deceleration ratio 1: 90, single shaft
- All metal gear, blue plastic motor case
- The microcontroller without interference, anti-interference ability.
- Gear motor compatible with electric toy products such as scientific research electronic products, robot electric human body, bubble gun toy gun body, four-wheel drive toy car, aircraft toy, vibration product, etc.
