COMB

Combination Plier 6"

• The Pliers are made of very special grade steel.
• These are specially hardened & tempered to give tough body (45 48HRc)
• The cutting edges are induction hardened after individually matching to give high hardness of 55 / 60 HRC which does not get damaged even while cutting hard wires.
• Drop forged with high carbon steel and scientifically heat treated.
• The rivet is made from carbon steel, prevents play even after considerable long use.
• The cutting edges are sharp and precision machined to appropriate angle to cut hard and soft wires neatly and with ease
• More leverage due to its special design
