W3001/W3001A

DC 12V 120W Digital Temp Controller

• Output capacity: MAX 10Aemperature measurement, display; refrigeration, heating control
• Temperature setting upper and lower limits
• Simple operation, suitable for seafood machines.
• Temperature Measuring Range: 50~110°C
• Temperature Control Range: 50~110°C
• Control Accuracy: Upto 0.1?
• Easy to install
• Output type: Direct Output
• Upper key: The start temperature is displayed in one press, and long press to set start temperature.
