AA636

DC+-DC BUCK CONVERTOR 6.5 60V TO 3.3~40V ADJ. 50W

• EXCEPTIONAL VOLTAGE CONVERSION EFFECTIVELY - You can convert a wide range of voltages from 6.5V to 60V up to 1.25-30V using this DC-DC converter module. It is crucial that the input voltage is higher than the output voltage for superior performance.
• 10A MAX CURRENT - This module can handle a maximum current of 10A, making it convenient for various voltage lowering applications. The high amperage capability ensures that the devices continue to operate smoothly and safely.
• Excellent efficiency up to 97%: Unlike standard converters, this DC-DC module works with exceptional efficiency, reaching a maximum of 97%. This means you get the most out of your power supply, saving you unnecessary power consumption in the long run.
• User-friendly design with screw terminals: installation and connection of this module is a breeze, thanks to the input and output designed with screw terminals. Now you can easily connect your devices without the need for complicated tools or technical knowledge.
