NA66B

DC12-80V 600W ADJ. VOLT. Constant Current Module

- Module Type: Step-Up (Boost)
- Input voltage: 12V-60V
- Input Current: Maximum input current 15A
- Output voltage: 12V-80V adjustable
- Output Current: Maximum output current 10A
- Output Power: 600W
- Short circuit protection: Fuse (Input 20A Fuse)
- Overcurrent protection: Yes
- For your electronic equipment, power supply, you can set the output voltage with your system voltage.
- As the vehicle power supply for your laptop, PDA or digital products supply.
- DIY a high-power notebook mobile power: coupled with large-capacity 12V lithium battery pack, so that your books where you can light to where.
- The solar panel regulator.
- To the battery, rechargeable lithium batteries.
- Drive high-power LED lights.
