

P8610PC

Digital Power AMP Board 2 X 10W Double CH ST

- Dual Channel 10W per Channel - with volume Control, Dual-panel wiring, properly solve the crosstalk between the ground potential balance and channel wiring
- Operating voltage: DC 5 - 15V, Recommended voltage: 12 V, Quiescent current: 20 mA, Rated output power: 10 W +10 W (8)
- Excellent noise suppression in the case is not connected to the input audio, the ear close to the speaker can not hear any noise
- Unique with LC filter Class D digital power board, and can be used directly to the computer's USB powered.
- Frequency response: 20Hz to 50KHz
