FP1300

FINGER PRINT SCANER "FP1300"

• SENSITIVE SENSOR: High-performance, maintenance-free optical fingerprint sensor. Any finger at any time. The product uses optical fingerprint scanning technology to provide excellent image quality and product reliability.
• HIGH-QUALITY MATERIAL: High-quality industrial-grade ABS plastic material with scratch-resistant surface texture. Removable counterweight bracket. High-speed USB interface, LED indicates device status. Provide SDK for secondary development.
• USB FINGERPRINT SENSOR: This USB fingerprint sensor is designed for special applications and developer tools. The onboard electronic device will calibrate the device and encrypt the image data, and then send it through the USB interface.
• STRONG SENSITIVITY: The user only needs to place his/her finger on the illuminated sensor window, and the device can quickly and automatically capture fingerprint images,which meets your needs.
