MQ8

Hydrogen Gas Sensor Module H2 Alarm Detect

• Using high-quality dual-panel design, with power indicator and TTL signal output instructions.
• The switching signal having a DO (TTL) output and analog output AO.
• TTL output valid signal is low. (Low-level signal when the output light can directly connect to the microcontroller or relay module)
• The higher the voltage, the concentration of the analog output voltage is higher.
• A hydrogen gas detection with good sensitivity.
• There are four screw holes for easy positioning.
• Has a long life and reliable stability
• Rapid response and recovery characteristics
