LOG4

I2C 4CH 3.3V-5V BI-Directional Logic Level Convertor

• Mutual transform between 5V TTL and 3.3V TTL
• Four channels of logic and high voltage low voltage logic can two-way transform
• Portable and lightness, with 2 rows 6 pin contact pins
• Level Converter- 4 Channel Compatible with the bread plate, can be used directly put on the breadboard
• 4 Channel Module (great for I2C or SPI) and will work with all micro controllers, Arduino, Raspberry Pi, Intel Edison, NXP Mbed
