

BOANS

Indoor Antenna Patch Panel 7.5dBi

- Patch Panel Antenna for Mobile Signal Repeaters
- Gain-7.5dBi
- Frequency Range: 806-960/1710-2500 Mhz
- Suitable for 2G/3G/4G LTE
- The antenna ensures highest performance for in-building passive DAS applications avoiding passive intermodulation products due to the PIM optimized design
- The antenna is constructed from lightweight materials ideal for easy wall mounting
- The low profile and off-white radome blends easily into most building aesthetics with minimum visual impact
