LM358

XD-21 100 Times LM358 Gain Amplification Module

- LM358 chip onboard.
- 100 gain of the circuit design.
- 10K onboard adjustable resistance, you can adjust the magnification.
- Onboard power indicator.
- The chip has led major pin can be directly input and output signals.
- The working voltage: 5 - 12V.
- Size:32.7mm * 13.3mm.
