

LM35DZ

LM35DZ Analog Temperature Sensor

- This is the same temperature sensor that is included in our SparkFun Inventor's Kit.
- The TMP36 is a low voltage, precision centigrade temperature sensor. It provides a voltage output that is linearly proportional to the Celsius temperature.
- \bullet The output voltage can be converted to temperature easily using the scale factor of 10 mV/°C.
- Voltage Input: 2.7 V to 5.5 VDC
- 10 mV/°C scale factor
- ±2°C accuracy over temperature
- ±0.5°C linearity
- Operating Range: -40°C to +125°C
