

RC522K

MFRC 522 RFID MODULE WITH RF CARD AND FOB

- It uses the advanced modulation system, fully integrated at 13.56MHz with all kinds of positive non-contact communication protocols.
- Support 14443A compatible answer signal. DSP deal with ISO14443A frames and error correction.
- RC522 - RFID Reader features an outstanding modulation and demodulation algorithm to serve effortless RF communication at 13.56 MHz.
- The S50 RFID Cards will ease up the process helping you to learn and add the 13.56 MHz RF transition to your project.
