MT3608

MT3608 2A Max DC-DC Step Up Power Module Booster Power Module

- This module has a multi-turn potentiometer that you can use to adjust the output voltage.
- Since the potentiometer has 25 turns of adjustment you can easily adjust the output of the module to exactly the voltage you need.
- It is efficient up to 93%
- It can source a good amount of current
- It is an inexpensive converter module
- It is simple to adjust to get your desired increase in voltage
