T2030

Power Supply Audio Amplifier Board 6-12V 18W TDA2030

- Working voltage: 6-12V
- Plate size: approx.31.6x23.2mm/1.24x0.91''
- On-board TDA2030A audio power amplifier chip.
- Design of single channel 18W power amplifier circuit.
- Audio Amplifier Board Module TDA2030A 6-12V 18W Single Amp Power Supply Module
- On-board trumpet connection seat.
- On board 10K adjustable resistor, which can adjust the amplified volume.
- On-board power indicator lamp.
- The chip's main pin has been extracted, and it can input the audio signal directly.
