AB001

PS2 Game JoyStick Module

- 2.54mm pin interface leads
- Long service life and stable performance
- Standard interface and electronic building blocks
- Widely use in Arduino DIY projects
- Cross rocker as a two-way 10K resistor, with the rocker in a different direction.
- Dimensions: 40 x 27 x 15 (LxWxH) mm.
- Weight: 10gm (without Hat).
- 2.54mm pin interface leads.
- Operating Voltage: 5V.
- Long service life and stable performance.
- Standard interface and electronic building blocks.
- Widely use in Arduino DIY projects.
