PULYM

PULLEY MULTI COLOUR MEDIUM

- **Vibrant Multicolor Design**: Eye-catching colors for easy identification and added visual appeal in educational projects.
- **Medium Size**: Perfect for small-scale projects such as toy motors, science experiments, and mechanical systems.
- **Durable and Lightweight**: Constructed from high-quality, durable materials that are both lightweight and easy to work with.
- **Smooth Rotation**: Engineered for low friction and smooth movement, ideal for toy motor setups and mechanical experiments.
- **Educational Tool**: Great for teaching basic physics concepts like force, motion, and mechanical advantage in STEM learning activities.
- **Versatile**: Compatible with a variety of toy motor kits, science projects, and DIY mechanical systems.
- **Easy Integration**: Simple to install in various setups, perfect for hands-on learning and experimentation.
- **Child-Safe Materials**: Made from non-toxic, safe materials for classroom or home use, ensuring a safe learning experience.
- **Perfect for STEM Projects**: A fantastic addition to STEM kits, helping students build and understand simple machines and mechanisms.
- **Ideal for Model Building**: Useful in creating small mechanical models like cranes, lifts, and conveyors for practical demonstrations.
