Raspberry PI Acrylic Case

- It is unassembled 6-piece transparent Acrylic plastics that provide adequate protection for your Pi and access to all the ports.
- The case is compatible with all the latest launched Raspberry Pi 4 Models.
- It is very easy to assemble and de-assemble with push-pull locking notches.
- The case comes with a Protection film so that it will reach you without any scratch.
- Talking More about the case, this Acrylic case has a cooling fan slot and all other required slots to access the Pi.
- At the side, the case has GPIO slot from which you can route GPIO and CSI ribbon cable and a cut-out to provide the ease the micro SD card insertion and removal.
- At the top plate, it has Raspberry's engraved LOGO and at the bottom of the case, there are four-hole for mounting the Pi.
- The case has a top that can be open and close like Flap.
- This Acrylic Case for PI 4 is also designed so that you can see the Pi status LEDs clearly, and you need not put any efforts for fitting the pi inside the case, it fits the pi accurately just like the mobile phone cover.
- This is a really durable case that will do a great job protecting your Raspberry Pi as well as gives the good cabinet looks to your Pi.
