RP4

Remote Controller Module 4 Channel 12V

• Remote Controlller Module 4 Channel 12V DC with plastic case
• Can control 4 devices through a single controller with 12V DC input
• Current:Standby less than 6mA, Working less than 128mA
• Reciever Sensitivity: 3-105 dBm
• Working Frequency: 315 MHz
• Pairing with remote through learning code method
• Works with any remote control of same frequency, so no danger of loosing the remote
• Max. Load: 10A per Relay with resistive load less than 8 A, inductive load less than 3A
• Working mode: Momentary, Latch and Toggle
• Every relay can be set up independently
• Demodulation Method: ASK; Output data level: TTL
