ROCKER SWITCH ROUND 3PIN LED COPPER WP

• LED Illuminated Pushbutton: The Rocker Switch features a 3-pin design with an LED illuminated pushbutton that glows when the switch is turned on.The LED light provides a visual indication of the switch's status, making it easy to view and operate in low light conditions.
• Waterproof Design: The waterproof design of the rocker switch ensures that the switch will remain functional even when exposed to wet or damp conditions.
• 12V Power: The rocker switch operates on a 12V power supply, making it compatible with most vehicles, boats, and trucks. 12V power rating ensures that the switch provides adequate power to the device while maintaining energy efficiency.
• Easy to Install: The Rocker Switch is easy to install and requires no special tools or expertise. It comes with a standard 3-pin connector that easily connects to existing wiring harnesses.
• Versatile: The waterproof rocker switch is versatile and can be used in a wide range of applications including automotive, marine, RV, ATV, and off-road vehicles.
