HS45

SCR Heat Sink "HS-45"

• Key Features Designed specifically for TO-220 package devices Efficient passive cooling without a fan Black anodized aluminum construction Compact and lightweight design Improves component stability and durability Easy mounting for regulators and MOSFETs Suitable for PCB and DIY electronics applications
• Applications 7805 / LM317 voltage regulator cooling MOSFET heat dissipation Motor driver circuits Power supply modules projects DIY electronics prototypes Industrial control circuits Advantages Prevents thermal shutdown Enhances circuit reliability Increases lifespan of semiconductors Simple installation Low-cost thermal management solution
