

PULSET

SET 60TEETH & 20 TEETH WITH 6MM

- Performance: The pulley set transmits smoothly and non slip, with precise teeth pitch and constant transmission ratio, efficient and energy saving.
- Rubber Timing Belt: The closed timing belt adopts fiber reinforced rubber, which is full of elastic, provides excellent working performance.
- Wide Purpose: This pulley kit can be widely used in 3D printer, milling machine, gear grinding machine, drilling machine, CNC lathe, gear hobbing machine or other mechanical transmission occasion.
- Aluminum Alloy Pulley: The pulley is fine made of aluminum alloy material, and the surface is oxidized, which is anti aging, has high strength and long service life.
- Easy Installation: The pulley kit is simple in structure, comes with a wrench, easy to install and disassemble, making your 3D printer work easier and more convenient.
