

RING20

Steel Metal Rings for CCTV Camera 'Pole' Stands 20 cm

- contains more nickel and molybdenum, it usually exhibits better ductility and toughness. This makes SS 316 hose clamps not easy to break at low or high temperatures.
- Non-Metric: 5/16" hex screw slotted. British inch diameter stamped on 1/2"width band for easy identification when using.
- Clamping Torque: Breaking Torque 75 lb-in and recommended installation torque 37-45 lb-in.
- Widely Use: Our 316 stainless clamps can be commonly used in garden, automotive, boat and personal watercraft, food industry and more industrial and plumbing applications to prevent leakage or detachment of hoses and pipes.
