# T8932

## TDA8932 DIG Power Amplifier Board 35W Mono

• The board uses a high-performance digital amplifier TDA8932 chip.
• Produce good quality sound by this module.
• Mono digital audio power amplifier chip.
• High output and low power consumption.Suitable for the transformation of the active speakers, product development, and other audio application.
• Module Type: TDA8932 35W
• Operating Voltage: Single DC10 ~ 30V
• Recommended Voltage: 24V
• Current: Above 2A Switching Power Supply
• Output Power: 35W x 1
• Speaker Impedance: 4-8 ohm, 8 ohm best
• Circuit configuration: Mono BTL Output
