AB076

Thermal Thermistor Temperature Sensor

- NTC thermistor sensor, good sensitivity
- The comparator output signal is more than 15mA.
- Possibel to adjust the temperature distribution position detection threshold
- Working voltage: 3.3V-5V
- Output form: DO digital switching outputs (0 and 1) and AO analog voltage output
- Fixed bolt hole for easy installation
- Small PCB board size: 3.2cm x 1.4cm
