TT485

TTL TO RS485 Power Supply Convertor Board

• This module fully considers the 485-bus lightning protection design and anti-interference design,
• The power supply of this product is wide voltage (3.0V ~ 30V), 3.3V system and 5.0V system compatible, 3.3V and 5.0V signals can match
• It has extremely high EMC (electromagnetic compatibility) and EMI (electromagnetic anti-interference) performance
• With standard 2.54 pitch pin headers for your secondary development
• With 120-ohm matching resistance, short-circuit R0 to enable matching resistance, short-circuit is recommended for long-distance transmission
