UM66

UM66 To 92 Melody IC

- Supply Voltage: -0.3V ~ +5V
- 1.3V to 3.3V operating voltage and low power consumption
- Level-hold mode to play repeatedly
- One-shot or level hold mode
- Plays a melody consisting of 64 note
- RC oscillator on chip
- 64-note ROM memory
- Sound range: 2 octaves
- Tempo: 15 kinds (presto-largo)
- Direct Piezo drive
- Solutions of automatic stop or repeat of the melody
- The dynamic speaker can be driven with an external NPN transistor
- Operating Ambient Temperature: -10°C ~ +60°C
- Storage Temperature: -55°C ~ +125°C
