PD0049

USB-C PD TYPE C TRIGGER BOARD PQ/DC MODULE DC 9V

• Compatible with power electronics projects with USB-C power input
• PDC004 uses a hardware PD identification chip. Die Identifikationslogik dieses Chip dient dazu, das Modul dazu zu bringen, eine feste Spannung auszul?sen. If the power supply does not provide the required voltage, the lower voltage is provided.
• Compact size: ?e with dimensions of 16.3 x 10.2 x 3.2 mm for easy integration.
• Supports up to 5 A current for high-performance applications. To use more than 3A, you must use a Type-C cable with electronic markings. A genuine USB PD power supply is required and not suitable for dedicated chargers. Reading charging head information is not supported. The random voltage selection is not supported.
