W1800

WCS1800 Current Sensor

• The current detection resolution of 32mV / A
• Output overcurrent signal indication
• Overcurrent signal is set critical point adjustable settings Resolution 3A
• With mounting holes for easy firmware installation
• Sampling current converting analog signal output, which can be accessed ADC, TTL level signal output, which can be accessed microcontroller IO port control.
• The output signal is the signal level of the analog signal.
• Maximum detection current selectable: 2A / 5A / 7.5A / 20A / 30A / 35A / 60A / 75A / 100A / 150A / 200A.
