

RXB39X

Wireless Receiver 4ch Module "RXB39-X"

- **COMPATIBILITY:** 433MHz wireless receiver module designed for remote control and automation applications
- **CHANNELS:** Features 4 independent receiving channels for versatile signal processing and control capabilities
- **DESIGN:** Compact circuit board with integrated antenna spring and high-quality components for reliable signal reception
- **TECHNICAL SPECS:** Operating voltage range of 3.3V to 5V DC, with built-in superheterodyne receiving circuit
- **INSTALLATION:** Standard 7-pin interface layout for straightforward integration with microcontrollers and development boards
