

SE009F

WIRELESS VIBERATER SENSOR "009F" (433)

- Wireless Vibration Sensor The Vibration Detector is perfect for anyone who wants to detect break ins or intrusions through concrete walls, ceilings, or floors. If a crime is committed, the Vibration Detector can identify a breach and alert authorities in time to catch the criminal. The detector operates on the principle of resonance of frequency. False alarms are avoided with the proper setting of the intensity controller. The vibration detector can be fitted to windows, door frames, walls, ceilings, etc.
