T31162

XH-M139 2.1 Ch Digital Power Amplifier 12V- 24V TPA3116D2 2*50W 100W

• The amplifier board uses TPA3116D2 chip as core which is a high-performance digital power amplifier chip.
• Wide voltage power supply is from 12V to 24V DC, energy saving design, the efficiency is high.
• Just connect the power supply and loudspeaker box, you can enjoy the pure digital music.
• You can adjust the volume by themselves easily.
