TM273

XH-M273 KARAOKE MICROPHONE AMP MODULE ST AC 12V

- Using PT2399 reverberation chip, with NE5532 op amp, it can mix human voice and music, which can realize independent adjustment of music volume, microphone volume and reverberation time to achieve K song effect
- It can be used for DC 12-24V power supply or AC 5-12V, which can be directly used for various digital power amplifier boards. If the power supply voltage is the same, the power supply can be shared
- Input voltage: DC12-24V
- Reverberation chip: PT23999
- Microphone input: 2
- Knob spacing: 24MM Microphone spacing: 17.6MM
- Output channel: 2 channels
- Frequency response range: 25HZ-17KHZ
- Appearance size: 117 x 53MM
- Weight: 75 grams
